## **TELL CITY'S 2023 LEAF REMOVAL BLITZ**

Your Street Department will be starting October 30<sup>th</sup>. with the removal of leaves from residents' yards. Please see the included map for an approximate date when we will be in your area. We will be in each area for one week, but don't worry, we understand things happen, so please be patient if yours are not removed right away. We will make several passes. This is very dependent on the weather. Wet leaves are very hard to pick and can damage the equipment.

Please move vehicles off the streets when you can as we will not be collecting leaves from under vehicles due to the liability of damages to vehicles.

Please rake all leaves to the edge of your yard and not into the gutters, if it rains, they will plug up the gutter drains. Also please keep trash and limbs out of the piles. The ground up leaves are used as compost and sticks and limbs will plug up the leaf vac.

Thank you in advance for your patience and understanding. We will work hard as always to ensure our Great City is something to be proud of.
